- **Cleansing supplies** 1.
- UriCap Female 2.
- Extension tube 3.
- 4. Urine bag
- 5. Tubing securement device
- 6. Water based lubricant
- 7. Skin preperation pad
- No suction required

# **Application**

area Urethral opening Outer Labia

Spread the inner and outer labia.

Inspect for anatomy compatibility and

Upper aspect of vaginal opening

Inner Labia

 $\mathbf{\Delta}$ 

\* Do not use the UriCap If the patient has vaginal discharge, itch, inflammation, sores, redness, bleeding, skin condition, pelvic prolapse (stage 2 and up) or silicone allergy.

The labia minora should be separated widely to not get caught under the device.

E Spread the outer <u>and inner</u> labia wide-

G Close all labial folds over the UriCap, then release hand.

H Apply skin prep (part 7). Secure tubing to inner thigh. Ensure ample slack in the tubing.

Remain in a lying position for at least an hour before position change.

Avoid opening the labia after the application as it may break the seal.

# Removal

Spread labia apart and peel of the device from top to bottom. Provide perineal care. Never pull device straight out.

Always review the Instructions for Use (IFU) including indications, contraindications, warnings, precautions. Follow facility policy when using the UriCap Female
